

Request for Taxpayer Identification Number and Certification

Give Form to the
requester. Do not
send to the IRS.

Print or type See Specific Instructions on page 2.	Name (as shown on your income tax return)	
	Business name/disregarded entity name, if different from above	
	Check appropriate box for federal tax classification (required): ☒ Individual/sole proprietor ☐ C Corporation ☐ S Corporation ☐ Partnership ☐ Trust/estate ☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=partnership) ▶ ☐ Other (see instructions) ▶	
	☐ Exempt payee	
	Address (number, street, and apt. or suite no.) City, state, and ZIP code List account number(s) here (optional)	Requester's name and address (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on the "Name" line to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Social security number								
			-				-	

Employer identification number								
			-					

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. citizen or other U.S. person (defined below).

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions on page 4.

Sign Here	Signature of U.S. person ▶	Date ▶

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

**NOTICE TO TENANT
DISCLOSURE OF BEDBUG INFESTATION HISTORY**

Pursuant to the NYC Housing Maintenance Code, an owner/managing agent of residential rental property shall furnish to each tenant signing a vacancy lease a notice that sets forth the property's bedbug infestation history.

Name of tenant(s): _____

Subject Premises: _____

Apt. #: _____

Date of vacancy lease: _____

BEDBUG INFESTATION HISTORY
(Only boxes checked apply)

- ☐ There is no history of any bedbug infestation within the past year in the building or in any apartment.
- ☐ During the past year the building had a bedbug infestation history that has been the subject of eradication measures. The location of the infestation was on the _____ floor(s).
- ☐ During the past year the building had a bedbug infestation history on the _____ floor(s) and it has not been the subject of eradication measures.
- ☐ During the past year the apartment had a bedbug infestation history and eradication measures were employed.
- ☐ During the past year the apartment had a bedbug infestation history and eradication measures were not employed.
- ☐ Other: _____

Signature of Tenant(s): _____ Dated: _____

Signature of Owner/Agent: _____ Dated: _____

Disclosure of Information on Lead-Based Paint and /or Lead-Based Paint Hazards

Lead warning Statement

Housing built before 1978 may contain lead-based paint. Lead from paint, paint chips, and dust can pose health hazards if not managed properly. Lead exposure is especially harmful to young children and pregnant women. Before renting pre-1978 housing, lessors must disclose the presence of known lead-based paint and/or lead-based paint hazards in the dwelling. Lessees must also receive a federally approved pamphlet on lead poisoning prevention.

Lessor's Disclosure

(a) Presence of lead-based paint and/or lead-based paint hazards (check (i) or (ii) below):

(i) _____ Known lead-based paint and/or lead-based paint hazards are present in the housing (explain).

(ii) _____ Lessor has no knowledge of lead-based paint and /or lead-based paint hazards in the housing.

(b) Records and reports available to the lessor (check (i) or (ii) below):

(i) _____ Lessor has provided the lessee with all available records and reports pertaining to lead-based paint and/or lead based paint hazards in the housing (list documents below).

(ii) _____ Lessor has no reports or records pertaining to lead-based paint and/or lead-based paint hazards in the housing.

Lessee's Acknowledgement (initial)

(c) _____ Lessee has received copies of all information listed above.

(d) _____ Lessee has received the pamphlet Protect Your Family from Lead in Your Home.

Agent's Acknowledgment (initial)

(e) _____ Agent has informed the lessor of the lessor's obligations under 42 U.S.C. 4852(d) and is aware of his/her responsibility to ensure compliance.

Certification of Accuracy

The following parties have reviewed the information above and certify, to the best of their knowledge, that the information they provided is true and accurate.

Lessor Date

NEW YORK CITY LEAD PAINT NOTICE
[To be Attached to the Lease of the Apartment]
LEASE/COMMENCEMENT OF OCCUPANCY NOTICE FOR PREVENTION OF LEAD-
BASED PAINT HAZARDS—INQUIRY REGARDING CHILD

You are required by law to inform the owner if a child under seven years of age resides or will reside in the dwelling unit (apartment) for which you are signing this lease/commencing occupancy. If such a child resides or will reside in the unit, the owner of the building is required to perform an annual visual inspection of the unit to determine the presence of lead-based paint hazards. **IT IS IMPORTANT THAT YOU RETURN THIS FORM TO THE OWNER OR MANAGING AGENT OF YOUR BUILDING TO PROTECT THE HEALTH OF YOUR CHILD.** If you do not respond to this notice, the owner is required to attempt to inspect your apartment to determine if a child under seven years of age resides there.

If a child under seven years of age does not reside in the unit now, but does come to live in it at any time during the year, you must inform the owner in writing immediately. If a child under seven years of age resides in the unit, you should also inform the owner immediately at the address below if you notice any peeling paint or deteriorated subsurfaces in the unit during the year.

Please complete this form and return one copy to the owner or his or her agent or representative when you sign the lease/commence occupancy of the unit. Keep one copy of this form for your records. You should also receive a copy of a pamphlet developed by the New York City Department of Health and Mental Hygiene explaining about lead-based paint hazards when you sign your lease/commence occupancy.

CHECK ONE:

- ☐ A child under seven years of age resides in the unit
- ☒ A child under seven years of age does not reside in the unit.

_____(Occupant signature)

Print occupant's name, address and apartment number _____

(NOT APPLICABLE TO RENEWAL LEASE) Certification by owner: I certify that I have complied with the provisions of §27-2056.8 of Article 14 of the Housing Maintenance Code and the rules promulgated thereunder relating to duties to be performed in vacant units, and that I have provided a copy of the New York City Department of Health and Mental Hygiene pamphlet concerning lead-based paint hazards to the occupant.

_____(Owner signature)

RETURN THIS FORM TO _____

OCCUPANT: KEEP ONE COPY FOR YOUR RECORDS
OWNER COPY/OCCUPANT COPY

WINDOW GUARDS REQUIRED

LEASE NOTICE TO TENANT

You are required by law to have window guards installed if a child 10 years of age or younger lives in your apartment.

Your Landlord is required by law to install window guards in your apartment:

- if you ask him to put in window guards at any time (you need not give a reason)

OR

- if a child 10 years of age or younger lives in your apartment.

It is a violation of law to refuse, interfere with installation, or remove window guards where required.

CHECK ONE

- ☐ CHILDREN 10 YEARS OF AGE
OR YOUNGER LIVE IN MY APARTMENT
- ☐ NO CHILDREN 10 YEARS OF AGE OR
YOUNGER LIVE IN MY APARTMENT
- ☐ I WANT WINDOW GUARDS EVEN
THOUGH I HAVE NO CHILDREN
10 YEARS OF AGE OR YOUNGER

TENANT (PRINT)

TENANT SIGNATURE

#49 in a series of Health Bulletins on issues of pressing interest to all New Yorkers

Protect Your Child From Lead Poisoning

**Landlords MUST fix peeling lead paint.
If they don't, call 311.**

• Available in Spanish and Chinese: call 311 or visit nyc.gov/health
• Disponible en español: llame al 311 o visite nyc.gov/health
• 需要中文服務 - 可電 311 或造訪網址: nyc.gov/health

Keep Your Child Away From Lead

- Peeling lead paint is the most common cause of lead poisoning in young children.
- Children with lead poisoning may develop health, learning and behavioral problems.
- Young children ages 6 months to 3 years are the most at risk.
- Lead dust from peeling paint can land on window sills, floors and toys. When children play and put their hands and toys in their mouths, they may swallow lead dust.

Children can also be exposed to lead from:

- Items from other countries, such as:
 - Health remedies.
 - Candies, spices and other foods.
 - Cosmetics.
 - Metal or painted toys and jewelry.
- Clay pots and dishes used for cooking, serving or storing food.
- Clothes and tools used by household members in jobs or hobbies that involve lead, such as construction.

Protect Your Family From Lead In Your Home

Department of Housing
and Urban Development

Are You Planning To Buy, Rent, or Renovate a Home Built Before 1978?

Many houses and apartments built before 1978 have paint that contains high levels of lead (called lead-based paint). Lead from paint, chips, and dust can pose serious health hazards if not taken care of properly.

OWNERS, BUYERS, and RENTERS are encouraged to check for lead (see page 6) before renting, buying or renovating pre-1978 housing.

Federal law requires that individuals receive certain information before renting, buying, or renovating pre-1978 housing:

LANDLORDS have to disclose known information on lead-based paint and lead-based paint hazards before leases take effect. Leases must include a disclosure about lead-based paint.

SELLERS have to disclose known information on lead-based paint and lead-based paint hazards before selling a house. Sales contracts must include a disclosure about lead-based paint. Buyers have up to 10 days to check for lead.

RENOVATORS disturbing more than 2 square feet of painted surfaces have to give you this pamphlet before starting work.

IMPORTANT!

Lead From Paint, Dust, and Soil Can Be Dangerous If Not Managed Properly

FACT: Lead exposure can harm young children and babies even before they are born.

FACT: Even children who seem healthy can have high levels of lead in their bodies.

FACT: People can get lead in their bodies by breathing or swallowing lead dust, or by eating soil or paint chips containing lead.

FACT: People have many options for reducing lead hazards. In most cases, lead-based paint that is in good condition is not a hazard.

FACT: Removing lead-based paint improperly can increase the danger to your family.

If you think your home might have lead hazards, read this pamphlet to learn some simple steps to protect your family.

Lead Gets in the Body in Many Ways

Childhood lead poisoning remains a major environmental health problem in the U.S.

Even children who appear healthy can have dangerous levels of lead in their bodies.

People can get lead in their body if they:

- ◆ Breathe in lead dust (especially during renovations that disturb painted surfaces).
- ◆ Put their hands or other objects covered with lead dust in their mouths.
- ◆ Eat paint chips or soil that contains lead.

Lead is even more dangerous to children under the age of 6:

- ◆ At this age children's brains and nervous systems are more sensitive to the damaging effects of lead.
- ◆ Children's growing bodies absorb more lead.
- ◆ Babies and young children often put their hands and other objects in their mouths. These objects can have lead dust on them.

Lead is also dangerous to women of childbearing age:

- ◆ Women with a high lead level in their system prior to pregnancy would expose a fetus to lead through the placenta during fetal development.

Lead's Effects

It is important to know that even exposure to low levels of lead can severely harm children.

In children, lead can cause:

- ◆ Nervous system and kidney damage.
- ◆ Learning disabilities, attention deficit disorder, and decreased intelligence.
- ◆ Speech, language, and behavior problems.
- ◆ Poor muscle coordination.
- ◆ Decreased muscle and bone growth.
- ◆ Hearing damage.

While low-lead exposure is most common, exposure to high levels of lead can have devastating effects on children, including seizures, unconsciousness, and, in some cases, death.

Although children are especially susceptible to lead exposure, lead can be dangerous for adults too.

In adults, lead can cause:

- ◆ Increased chance of illness during pregnancy.
- ◆ Harm to a fetus, including brain damage or death.
- ◆ Fertility problems (in men and women).
- ◆ High blood pressure.
- ◆ Digestive problems.
- ◆ Nerve disorders.
- ◆ Memory and concentration problems.
- ◆ Muscle and joint pain.

**Lead affects
the body in
many ways.**

Where Lead-Based Paint Is Found

In general, the older your home, the more likely it has lead-based paint.

Many homes built before 1978 have lead-based paint. The federal government banned lead-based paint from housing in 1978. Some states stopped its use even earlier. Lead can be found:

- ◆ In homes in the city, country, or suburbs.
- ◆ In apartments, single-family homes, and both private and public housing.
- ◆ Inside and outside of the house.
- ◆ In soil around a home. (Soil can pick up lead from exterior paint or other sources such as past use of leaded gas in cars.)

Checking Your Family for Lead

Get your children and home tested if you think your home has high levels of lead.

To reduce your child's exposure to lead, get your child checked, have your home tested (especially if your home has paint in poor condition and was built before 1978), and fix any hazards you may have. Children's blood lead levels tend to increase rapidly from 6 to 12 months of age, and tend to peak at 18 to 24 months of age.

Consult your doctor for advice on testing your children. A simple blood test can detect high levels of lead. Blood tests are usually recommended for:

- ◆ Children at ages 1 and 2.
- ◆ Children or other family members who have been exposed to high levels of lead.
- ◆ Children who should be tested under your state or local health screening plan.

Your doctor can explain what the test results mean and if more testing will be needed.

Identifying Lead Hazards

Lead-based paint is usually not a hazard if it is in good condition, and it is not on an impact or friction surface, like a window. It is defined by the federal government as paint with lead levels greater than or equal to 1.0 milligram per square centimeter, or more than 0.5% by weight.

Deteriorating lead-based paint (peeling, chipping, chalking, cracking or damaged) is a hazard and needs immediate attention. It may also be a hazard when found on surfaces that children can chew or that get a lot of wear-and-tear, such as:

- ◆ Windows and window sills.
- ◆ Doors and door frames.
- ◆ Stairs, railings, banisters, and porches.

Lead dust can form when lead-based paint is scraped, sanded, or heated. Dust also forms when painted surfaces bump or rub together. Lead chips and dust can get on surfaces and objects that people touch. Settled lead dust can re-enter the air when people vacuum, sweep, or walk through it. The following two federal standards have been set for lead hazards in dust:

- ◆ 40 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) and higher for floors, including carpeted floors.
- ◆ 250 $\mu\text{g}/\text{ft}^2$ and higher for interior window sills.

Lead in soil can be a hazard when children play in bare soil or when people bring soil into the house on their shoes. The following two federal standards have been set for lead hazards in residential soil:

- ◆ 400 parts per million (ppm) and higher in play areas of bare soil.
- ◆ 1,200 ppm (average) and higher in bare soil in the remainder of the yard.

The only way to find out if paint, dust and soil lead hazards exist is to test for them. The next page describes the most common methods used.

Lead from paint chips, which you can see, and lead dust, which you can't always see, can both be serious hazards.

Checking Your Home for Lead

Just knowing that a home has lead-based paint may not tell you if there is a hazard.

You can get your home tested for lead in several different ways:

- ◆ A paint **inspection** tells you whether your home has lead-based paint and where it is located. It won't tell you whether or not your home currently has lead hazards.
- ◆ A **risk assessment** tells you if your home currently has any lead hazards from lead in paint, dust, or soil. It also tells you what actions to take to address any hazards.
- ◆ A combination risk assessment and inspection tells you if your home has any lead hazards and if your home has any lead-based paint, and where the lead-based paint is located.

Hire a trained and certified testing professional who will use a range of reliable methods when testing your home.

- ◆ Visual inspection of paint condition and location.
- ◆ A portable x-ray fluorescence (XRF) machine.
- ◆ Lab tests of paint, dust, and soil samples.

There are state and federal programs in place to ensure that testing is done safely, reliably, and effectively. Contact your state or local agency (see bottom of page 11) for more information, or call **1-800-424-LEAD (5323)** for a list of contacts in your area.

Home test kits for lead are available, but may not always be accurate. Consumers should not rely on these kits before doing renovations or to assure safety.

What You Can Do Now To Protect Your Family

If you suspect that your house has lead hazards, you can take some immediate steps to reduce your family's risk:

- ◆ **If you rent, notify your landlord of peeling or chipping paint.**
- ◆ **Clean up paint chips immediately.**
- ◆ **Clean floors, window frames, window sills, and other surfaces weekly.** Use a mop or sponge with warm water and a general all-purpose cleaner or a cleaner made specifically for lead. **REMEMBER: NEVER MIX AMMONIA AND BLEACH PRODUCTS TOGETHER SINCE THEY CAN FORM A DANGEROUS GAS.**
- ◆ **Thoroughly rinse sponges and mop heads after cleaning dirty or dusty areas.**
- ◆ **Wash children's hands often, especially before they eat and before nap time and bed time.**
- ◆ **Keep play areas clean.** Wash bottles, pacifiers, toys, and stuffed animals regularly.
- ◆ **Keep children from chewing window sills or other painted surfaces.**
- ◆ **Clean or remove shoes before entering your home to avoid tracking in lead from soil.**
- ◆ **Make sure children eat nutritious, low-fat meals high in iron and calcium, such as spinach and dairy products.** Children with good diets absorb less lead.

Reducing Lead Hazards In The Home

Removing lead improperly can increase the hazard to your family by spreading even more lead dust around the house.

Always use a professional who is trained to remove lead hazards safely.

In addition to day-to-day cleaning and good nutrition:

- ◆ You can **temporarily** reduce lead hazards by taking actions such as repairing damaged painted surfaces and planting grass to cover soil with high lead levels. These actions (called “interim controls”) are not permanent solutions and will need ongoing attention.
- ◆ To **permanently** remove lead hazards, you should hire a certified lead “abatement” contractor. Abatement (or permanent hazard elimination) methods include removing, sealing, or enclosing lead-based paint with special materials. Just painting over the hazard with regular paint is not permanent removal.

Always hire a person with special training for correcting lead problems—someone who knows how to do this work safely and has the proper equipment to clean up thoroughly. Certified contractors will employ qualified workers and follow strict safety rules as set by their state or by the federal government.

Once the work is completed, dust cleanup activities must be repeated until testing indicates that lead dust levels are below the following:

- ◆ 40 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) for floors, including carpeted floors;
- ◆ 250 $\mu\text{g}/\text{ft}^2$ for interior windows sills; and
- ◆ 400 $\mu\text{g}/\text{ft}^2$ for window troughs.

Call your state or local agency (see bottom of page 11) for help in locating certified professionals in your area and to see if financial assistance is available.

Remodeling or Renovating a Home With Lead-Based Paint

Take precautions before your contractor or you begin remodeling or renovating anything that disturbs painted surfaces (such as scraping off paint or tearing out walls):

- ◆ **Have the area tested for lead-based paint.**
- ◆ **Do not use a belt-sander, propane torch, high temperature heat gun, dry scraper, or dry sandpaper** to remove lead-based paint. These actions create large amounts of lead dust and fumes. Lead dust can remain in your home long after the work is done.
- ◆ **Temporarily move your family** (especially children and pregnant women) out of the apartment or house until the work is done and the area is properly cleaned. If you can't move your family, at least completely seal off the work area.
- ◆ **Follow other safety measures to reduce lead hazards.** You can find out about other safety measures by calling 1-800-424-LEAD. Ask for the brochure "Reducing Lead Hazards When Remodeling Your Home." This brochure explains what to do before, during, and after renovations.

If you have already completed renovations or remodeling that could have released lead-based paint or dust, get your young children tested and follow the steps outlined on page 7 of this brochure.

If not conducted properly, certain types of renovations can release lead from paint and dust into the air.

Other Sources of Lead

While paint, dust, and soil are the most common sources of lead, other lead sources also exist.

◆ **Drinking water.** Your home might have plumbing with lead or lead solder. Call your local health department or water supplier to find out about testing your water. You cannot see, smell, or taste lead, and boiling your water will not get rid of lead. If you think your plumbing might have lead in it:

- Use only cold water for drinking and cooking.
- Run water for 15 to 30 seconds before drinking it, especially if you have not used your water for a few hours.

◆ **The job.** If you work with lead, you could bring it home on your hands or clothes. Shower and change clothes before coming home. Launder your work clothes separately from the rest of your family's clothes.

◆ **Old painted toys and furniture.**

◆ **Food and liquids stored in lead crystal or lead-glazed pottery or porcelain.**

◆ **Lead smelters** or other industries that release lead into the air.

◆ **Hobbies** that use lead, such as making pottery or stained glass, or refinishing furniture.

◆ **Folk remedies** that contain lead, such as "greta" and "azarcon" used to treat an upset stomach.

For More Information

The National Lead Information Center

Call **1-800-424-LEAD (424-5323)** to learn how to protect children from lead poisoning and for other information on lead hazards. To access lead information via the web, visit **www.epa.gov/lead** and **www.hud.gov/offices/lead/**.

EPA's Safe Drinking Water Hotline

Call **1-800-426-4791** for information about lead in drinking water.

Consumer Product Safety Commission (CPSC) Hotline

To request information on lead in consumer products, or to report an unsafe consumer product or a product-related injury call **1-800-638-2772**, or visit CPSC's Web site at: **www.cpsc.gov**.

Health and Environmental Agencies

Some cities, states, and tribes have their own rules for lead-based paint activities. Check with your local agency to see which laws apply to you. Most agencies can also provide information on finding a lead abatement firm in your area, and on possible sources of financial aid for reducing lead hazards. Receive up-to-date address and phone information for your local contacts on the Internet at **www.epa.gov/lead** or contact the National Lead Information Center at **1-800-424-LEAD**.

For the hearing impaired, call the Federal Information Relay Service at **1-800-877-8339** to access any of the phone numbers in this brochure.

Make Sure Your Child Gets a Blood Lead Test

- Doctors must test all children for lead poisoning at ages 1 and 2.
Ask your doctor about testing older children.
- Blood lead tests are covered by public and private health insurance.
For information about getting a blood lead test, call 311.

More Ways to Protect Your Child

- Keep children away from peeling paint and home repairs or renovations. Call 311 to find out about doing home repair work safely.
- Wash floors, window sills, toys and pacifiers often.
- Use *cold* tap water for making baby formula, drinking and cooking.
Let the cold water run for a couple of minutes before using it.
- Make sure there is no peeling paint in places where children regularly visit, such as the homes of relatives or babysitters, day-care centers and schools. Call 311 to report peeling paint in a day-care center or school.
- Wash children's hands, especially before eating.

Lead in Pregnancy

- Pregnant women with lead poisoning can develop high blood pressure, miscarry or give birth to babies that are born too soon or too small.
- Children born to mothers with lead poisoning may have learning and behavioral problems.

If you are pregnant or may become pregnant:

- Avoid using imported spices, snack foods, health remedies, cosmetics, and clay pots. They may contain lead.
- Never eat non-food items such as clay, pottery, soil or paint chips.
- At your first prenatal visit, your doctor should ask about your exposure to lead.
- Get a blood lead test if you think you have been exposed to lead or if you have had lead poisoning in the past.

FIX PEELING LEAD PAINT

What Landlords Must Do

In New York City, the law requires landlords to inspect and fix lead paint hazards – *at no cost to tenants*. The law applies to your apartment if:

- You live in a building built before 1960 (or between 1960 and 1978 if the owner knows the building has lead paint), **and**
- The building has 3 or more apartments, **and**
- A child under the age of 6 lives with you.

If the law applies to your apartment, your landlord must:

- **Send you an Annual Notice** asking if a child under the age of 6 lives with you.
- **Inspect your apartment** once a year for lead paint hazards if a child under the age of 6 lives with you.
- **Use safe work practices** to fix lead paint hazards and do renovation work.
- **Repair lead paint hazards** *before* you move in.

Never Dry-Scrape
or Dry-Sand
Lead Paint!

What Tenants Should Do

If your apartment is covered by the law (see above):

- **Fill out and return the Annual Notice** from your landlord asking if a child under the age of 6 lives with you. If you don't get the Annual Notice, call 311.
- **If you have a new baby**, or a child under age 6 comes to live with you, *tell your landlord in writing*.
- **Call 311 if your landlord does not fix peeling paint.** Ask for the Department of Housing Preservation and Development.
- **Call 311 if you think repair work is being done unsafely.** Ask for the Department of Health.
- **Call 311 if you live in a 1- or 2-family house with peeling paint and have a child under age 6.** Ask for the Department of Health.

Simple Steps To Protect Your Family From Lead Hazards

If you think your home has high levels of lead:

- ◆ Get your young children tested for lead, even if they seem healthy.
- ◆ Wash children's hands, bottles, pacifiers, and toys often.
- ◆ Make sure children eat healthy, low-fat foods.
- ◆ Get your home checked for lead hazards.
- ◆ Regularly clean floors, window sills, and other surfaces.
- ◆ Wipe soil off shoes before entering house.
- ◆ Talk to your landlord about fixing surfaces with peeling or chipping paint.
- ◆ Take precautions to avoid exposure to lead dust when remodeling or renovating (call 1-800-424-LEAD for guidelines).
- ◆ Don't use a belt-sander, propane torch, high temperature heat gun, scraper, or sandpaper on painted surfaces that may contain lead.
- ◆ Don't try to remove lead-based paint yourself.

Recycled/Recyclable

Printed with vegetable oil based inks on recycled paper
(minimum 50% postconsumer) process chlorine free.

If you think your home has high levels of lead:

- Get your home tested for lead as soon as possible.
- Wash children's hands, bottles, pacifiers, and toys often.
- Make sure children are wearing tooth-brush floss.
- Get your home checked for lead hazards.
- Regularly clean floors, windowsills, and other surfaces.
- Wash off all shoes before entering home.
- Talk to your landlord about lead paint abatement or abatement fund.
- Take precautions to avoid exposure to lead dust when renovating or painting lead-based paint (see EPA's Lead Renovation, Repair and Painting (RRP) for guidelines).
- Don't use a lead-based paint remover with a battery-operated heat gun, heater or soldering iron. Painted surfaces that may contain lead.
- Don't try to remove old-based paint yourself.
